

# FAQs Bus skylights

Below you will find answers to the most frequently asked questions about our products in the bus skylight series.

BT Premium

## **Is this new skylight available in solar design?**

No. A survey of bus manufacturers and customers has shown that there is no market acceptance for the extremely high additional price. Production numbers at BT K were so low in the past (approx. 250 units p.a.) that development costs would not have been recovered.

BT Premium

## **Is there a manual version of this new skylight?**

No. Trend to electrical operation for convenience reasons. Here the skylight can be automatically closed when the ignition is turned off or by rain sensor.

BT K

## **How can water penetration be prevented? What can be done to stop the skylight rattling?**

The arrester of the push-up mechanism can be bent towards the cover using a wrench. In this way the skylight will be pressed against the sealing when closed.
